Remote Control Code Matching Setting

First, turn off the power to the searchlight, then turn it back on after 10 seconds. Within 60 seconds of restoring power, press and hold the ON button on the remote control for 10 to 30 seconds. If pairing is successful, the searchlight will flash three times, indicating that the code has been matched and the remote control is ready for use.

Notice:

1. If the wireless remote control battery is low, the device will stop responding, and the indicator light will not illuminate when buttons are pressed. Please replace the battery.

2. Battery specifications: CR2032 3V.
